

ELIYONAI MOLERO

Senior Full Stack Engineer (Laravel, Vue.js)

✉ moleroeliyona@gmail.com

in <https://www.linkedin.com/in/molero-eliyona/>

📍 Chile (Open to Remote - LATAM / Global)

Senior Software Engineer with 5+ years of experience building scalable web applications for banking, public sector, and private companies. Specialized in Vue.js (Vue 3, Pinia) and PHP (Laravel, Lumen), with strong focus on security, performance, and maintainability.

Experienced working on high-impact systems such as banking portals and government platforms, implementing critical features, automated testing, and cloud-based architectures. Comfortable working in remote, cross-functional teams and production-critical environments.

EXPERIENCE

FullStack Developer

ZERVIZ SPA

09/2025 - PRESENT

Full Stack Developer at IPS - ChileAtiende

- Refactored the encryption system by integrating AWS KMS and applying current security best practices, implementing asymmetric key encryption.
- Led the migration of the ChileAtiende portal to the latest version of Laravel, upgrading critical dependencies in Composer and package.json.
- Implemented a user impersonation system for the Somos application, enabling secure access and operations under delegated user accounts.
- Standardized GitLab Merge Request templates to improve code quality, traceability, and consistency across changes.
- Managed and resolved incidents within the maintenance and operational continuity area, ensuring production system stability.
- Implemented unit tests to guarantee application reliability and reduce technical debt across several services.

Tech-Stack: Laravel, Lumen, MySQL, AWS, Dockers, Linux, Pest, VueJs, Nuxt.

Senior Frontend Developer

TCIT CLOUD SOLUTIONS SPA

02/2025 - 09/2025

Frontend Developer at BTG Pactual

- Developed and maintained the bank's customer portal using Vue 3, ensuring a smooth and responsive user experience.
- Implemented key features such as the Payment Button, allowing users to make direct deposits to their APV and investment accounts.
- Built the Employer Contribution Module, enabling automated monthly contributions from employers to their employees' APV funds.
- Performed unit testing with Vitest and end-to-end testing with Cypress to ensure high quality and reliability in production environments.

Tech-Stack: VueJs, Pinia, Vitest, Git, Github, Cypress

Software Full Stack Engineer

VIRTUALPOS SPA

06/2023 - 02/2025

- Analyzed and compiled project requirements following the company's established methodology and documented them accurately and comprehensively.
- Planned and organized tasks related to software development, as well as its implementation and deployment.
- Designed the software's logical structure, services, and data model, ensuring system coherence and efficiency.
- Implemented solutions using technologies such as PHP, Laravel, MySQL, Javascript, Restful APIs, and other tools adopted in the project.
- Conducted thorough development testing to ensure software quality and proper functionality, addressing identified errors during this process.
- Remained updated and conducted continuous research on new technologies that could optimize the software development process and enhance the final product's quality and security.
- Strictly adhered to internal security policies, especially regarding PCI (Payment Card Industry) security standards.

Tech-Stack: PHP, Laravel, Lumen, MySQL, JavaScript, VueJS, Git, AWS, Dockers.

Senior Consulting PHP

APIUX TECNOLOGÍAS SPA

09/2021 - 06/2023

Full Stack Developer at IPS - ChileAtiende

- Worked with a team of 8 developers, providing new development services, support for the operational continuity of the ChileAtiende portal, and assistance with various institutional procedures.
- Implemented evolutionary and corrective improvements by creating new models within the BackOffice of the portal.
- Developed a procedure that allows elderly individuals with a legal representative to renew their representation.
- Applied corrections related to cybersecurity, achieving data protection and security.
- Optimized portal performance by upgrading the Laravel framework from version 6 to 9.

Tech-Stack: PHP, Laravel, Lumen, MySQL, JavaScript, VueJS, NuxtJS, Dockers, Git, SCRUM.

System Coordinator

NEWEN SYSTEMS SPA

11/2020 - 08/2021

- Improved results in client requirement reports by developing new processes or projects for the development of new native, web, and hybrid information systems.
- Administered cloud services such as Google Cloud, Microsoft Azure, and Office 365, including creating new virtual machines, configuring DNS, and other tasks.
- Improved software development processes by creating a work plan based on the SCRUM methodology.
- Developed a platform for COVID-19 contact tracing to obtain daily results of potential contagions within companies.
- Led an external development team in the creation of a ticket system that improved productivity by 80%, streamlining the allocation of tickets to support staff and providing management reporting.

Tech-Stack: PHP, Laravel, MySQL, JavaScript, AJAX, Github, SCRUM.

PROJECTS

Web Application for events management - Elite Hospitality Group

Developed a monolithic web application that provided multiple features, including:

- Event creation with staff request functionality.
- Invoice generation and payment gateway integration, allowing clients to pay for completed events.
- Email notifications triggered upon event creation, updates, or cancellations.

Tech Stack: Laravel | VueJs | Bootstrap | MySQL | Dockers | Nginx | DigitalOcean

SPA y BackOffice - PeoplePro

Developed a single-page application (SPA) using NuxtJS for PeoplePro, with the following objectives:

- Display services offered on a landing page.
 - Create a BackOffice module that displays information on their employees, consuming Buk services through a REST API.
- There was also an intermediate security layer using Lumen to consume these Buk services.

Tech Stack: Laravel Lumen | NuxtJs | VueJs | Buefy | MySQL | Dockers | Nginx | DigitalOcean

SKILLS

- **Frontend:** Vue 3, Nuxt.js, Pinia, JavaScript (ES6+), HTML, CSS
- **Backend:** PHP, Laravel, Lumen, REST APIs
- **Testing:** Vitest, Cypress, Pest
- **Databases:** MySQL, MariaDB, PostgreSQL
- **DevOps & Cloud:** Docker, AWS, Azure, DigitalOcean, Linux
- **Tools:** Git, GitHub, GitLab, Jira
- **Methodologies:** Scrum
- **Languages:** Spanish (Native), English (C1), French (A2)

EDUCATIONS

Bachelor's Degree in Informatic Engineer

Private University Dr. Rafael Belloso Chacín - Maracaibo; Venezuela 2015

High School

Vinicio Andrade Bravo - Maracaibo; Venezuela 2009

CERTIFICATIONS

Microsoft Azure Fundamentals AZ-900

Microsoft Learning - 2021

Microsoft Azure Security, Compliance, and Identity Fundamentals SC-900T00

Microsoft Learning - 2021

SCRUM Product Owner

Certiprof - 2018
